

PROFESSIONAL PROFILE.

DevOps and Site Reliability Engineer with 4 years of experience in managing scalable, production-grade systems across AWS and Azure cloud platforms. Specialized in Kubernetes orchestration and cluster management, with strong expertise in Infrastructure as Code using Terraform. Proficient in building and maintaining robust CI/CD pipelines to enable efficient, secure, and reliable deployments. Experienced in end-to-end monitoring, alerting, and incident response to ensure high availability and optimal system performance.

SKILLS SUMMARY

Cloud Platforms: AWS, Microsoft Azure Infrastructure Provisioning Tools Terraform

CI / CD Tools: azure DevOps, Containerization Tools Docker, Kubernetes.

Cloud & DevOps: AWS (EC2, S3, IAM,) Azure (AKS, ACR, ACI, ARO, Azure DevOps)

Source Control Management Tools: Azure DevOps. Logging & Monitoring Tools Aws Cloud watch and ELK and lens.

Databases: Aws RDS and MongoDB. Application/Web Servers Apache, Tomcat, Nginx.

Scripting & Programming Languages: PowerShell, YAML.

CI/CD & Automation: Azure Pipelines, Terraform.

Ticketing & ITSM Tools: Dynamics 365 (DFM)

Work Experience Project:4

Infosys – Senior Associate Consultant at Infosys.

30/05/2025 – Present, Bangalore, India

- Troubleshoot and resolved complex issues in Azure Kubernetes Service (AKS) environments to ensure high availability of containerized applications.
- Diagnosed and resolved deployment and platform issues across Azure Red Hat OpenShift (ARO), Azure Container Instances (ACI), and Azure Container Registry (ACR).
- Replicated production AKS issues in test environments to perform effective Root Cause Analysis (RCA).
- Utilized Azure Security Center, AppLens, and Jarvis to analyze security, performance, and infrastructure incidents.
- Managed operational incidents using Dynamics 365 (DFM), ensuring timely resolution and effective stakeholder communication.
- Maintained troubleshooting documentation and operational runbooks to improve support efficiency and onboarding.

Key Strengths

- Expertise in troubleshooting and optimizing Azure cloud infrastructure to ensure high availability and performance.
- Skilled in resolving technical issues across Azure workloads.
- Proficient in supporting and maintaining Azure Cloud services, including incident management, RCA, and collaboration.
- Strong understanding of containerization and orchestration technologies.
- Hands-on experience with Kubernetes (AKS), ACI, ACR, and Azure-managed services.

Technical Skills

- Cloud Platform: Microsoft Azure (IaaS & PaaS), Azure Container Services (AKS, ACI, ACR, ARO)
- DevOps & Version Control: Azure DevOps.
- Containerization: Kubernetes, Docker, Azure Kubernetes Service (AKS)
- IaC Tool: Terraform
- Operating Systems: Windows & Linux
- Monitoring: Azure Monitor, Log Analytics, ASC, ASI, AppLens
- Other: Infrastructure troubleshooting, Incident Management, ITIL practices

Project Experience

- Provide 24x7 global technical support for Azure container services including AKS, ACI, ACR, and ARO.
- Troubleshoot issues related to container infrastructure state and configuration across Azure platforms.
- Handle and resolve Production (PRD) Severity A incidents with immediate mitigation actions.
- Perform root cause analysis (RCA) and ensure permanent resolution.
- Manage and prioritize support cases based on severity and business impact.
- Work extensively with ASC, ASI, and appliances during issue investigation and resolution.
- Monitor and analyze metrics and health charts using AppLens to identify performance and availability issues.

Certifications & Specializations

Microsoft Certified:

- AZ-104: Azure Administrator Associate
- AZ-400: Azure DevOps Expert
- AZ-900: Azure Fundamentals

Project:3

Designation: Senior Associate Consultant at Infosys, Bengaluru, India.

Client: Musgrave

Role: DevOps Engineer

Team Size: 7

Duration: 17-2-25 to 25-5-25

Responsibility:

- Implemented Infrastructure as Code (IaC) using Bicep to automate the provisioning of Azure Virtual Machines and related resources, ensuring consistent and repeatable deployments.
- Designed and maintained Azure DevOps pipelines for UI and Tosca projects, streamlining build, test, and deployment workflows across multiple environments.
- Integrated security and compliance checks into CI/CD pipelines, improving reliability and reducing manual intervention during deployments.

Project:2

Designation: DevOps Engineer at Primesoft, Hyderabad, India.

Client: Payapt

Role: DevOps Engineer Team Size: 10

Duration: Oct 2022 to till Feb 12th 2025.

Responsibility:

- CI/CD Pipeline Integration: Expertise in integrating Git, Azure DevOps, Maven, and Kubernetes to create efficient CI/CD pipelines for Java and UI applications
- Automated Build Processes: Skilled in automating build processes for Java applications using tools like Maven, creating JAR/WAR artifacts for deployment.
- Deployment Orchestration: Experience with Jenkins pipelines for deploying Java microservices, managing multiple deployment scenarios including JBoss and multi-application setups.
- Kubernetes & Cloud Deployment: Proficient in Kubernetes provisioning, Creating and managing Pods, and deploying Java microservices in AWS environments (EKS, ECR).
- AWS Services Management: Hands-on experience with AWS services including EC2, RDS, S3, auto-scaling, ELB, and troubleshooting server issues, ensuring smooth deployments.

Project-1

Client: Infinite

Role: Cloud Engineer Team Size: 8 Duration: Oct 2022 to till Date.

Responsibility

- Azure VM Deployment & Management: Conducted manual deployments and optimized Azure Virtual Machines, configuring essential software like Tomcat for Java applications (JAR/WAR files) while ensuring performance and reliability.
- Containerization & Docker Expertise: Containerized applications using Docker, developed Dockerfiles for automation, and deployed Docker containers on Azure VMs for consistent and portable application environments.
- Multi-Container Orchestration: Utilized Docker Compose to define and manage multi-container applications, including MongoDB, PostgreSQL, ELK stack, and RabbitMQ, streamlining complex setups.
- Performance Optimization & Monitoring: Optimized Docker containers for performance and resource efficiency, monitored container health, and proactively resolved issues to minimize downtime.

Professional Experience:

- Senior Associate Consultant at Infosys Feb17th2025 to Till Date
- Working as Azure and Aws DevOps Engineer for Primesoft, Hyderabad, India OCT 2022 to Feb 12th 2025.

Education Experience:

- B-tech in Civil Engineering from Chirala Engineering College Affiliated to JNTUK University in 2012-2016 with 62.88%.
- Intermediate from Board of Education, Guntur, AP with 67%.
- SSC (10th) from secondary school Education, Bhattiprolu, AP with 64%.

DECLARATION:

I hereby declare that the information furnished above is true to the best of my knowledge and belief.
